About Me

I'm a full-stack developer with 3+ years experience and focusing on React and Rust/Node.js based backend. I also have passions for computer visions.

Experience

Full-stack Developer, Spaice (pro.spaice.ca) — 2020-Present

- Architected the frontend structure and implement UI using React and Next.js, the frontend incorporates SSR, GraphQL, Suspense, Hooks API.

- Developed the backend which uses Rust, PostgresSQL and manage multiple services written in Rust or Node.js by using GRPC.

- Synced and managed subscription and one-time online payment through Stripe in the backend.

- Created the three.js based 3D design tool and canvas based 2D mood board tool in browser.

- Participated in maintaining the deployments using Kubernetes and Docker.

Frontend Developer, Ventmere — 2019-2020

- Developed the frontend for various services in React and Angular. Creating dashboards and analytics for marketing and merchandising.

- Implemented a template for generating excels with custom syntax.

- Designed pipelines to sync product data with various marketplace like Amazon, Newegg, etc.

- Maintained the backend and partially fix numerical or display issues.

Education

University of Toronto — Honours Bachelor of Computer Science, 2014-2019

Skills

Rust • Node.js • React • Angular • PostgresSQL • GraphQL • Python • Three.js • Kubernetes • Docker • Next.js
